

ABOUT IFED The International Federation of Esthetic Dentistry (IFED) was founded in 1994 by the American Academy of Esthetic Dentistry, the European Academy of Esthetic Dentistry and the Japanese Academy of Esthetic Dentistry.

THIS MONTH'S:

Prof. Dr. Daniel Edelhoff
Scientific Chair IFED 2013

WELCOME LETTER

Dear Readers,

It's time for the Oktoberfest in Munich, just the right time to draw your attention to a splendid international congress next year which coincides perfectly with the extremely popular Oktoberfest:

"IFED" stands for the International Federation of Esthetic Dentistry. Almost all prestigious societies for esthetic dentistry are incorporated in this umbrella organization. This organization provides access to the world's most famous speakers in the field of esthetic dentistry. The president of the DGÄZ, Prof. Robert Sader, the Congress President, Dr. Siegfried Marquardt, and the scientific committee of the IFED 2013 have succeeded in bringing together such an unprecedented international program in which top speakers will be participating. You can expect highly topical information on dental implantology, parodontology, endodonty, restorative dentistry, orthodontics and digital technology.

Furthermore, a special IFED Dental Technician's Conference was also organized by Mr Siegbert Witkowski (Master Dental Technician) who is well-known for bringing together the world's most famous speakers in the field of esthetic dental technology.

As you can see, it will be an unforgettable congress experience and this will be made even more interesting thanks to the exciting and varied program of events, the numerous cultural activities being offered, the attractive surrounding area and, not least, the Oktoberfest which rounds up the whole event.

Munich is always worth a visit, especially in September 2013.

Dr. Mauro Fradeani is an active Member of The American Academy of Esthetic Dentistry. He is the Founder and Director of the ACE Institute, Advanced Continuing Education centre in Pesaro, Italy, and author of the book "Esthetic Rehabilitation in Fixed Prosthodontics" edited by Quintessence International. He runs a private practice which specializes in prosthetics on natural dentition and on implants in Pesaro (Italy). We are pleased to hear that he will be speaking on the subject of "Esthetic challenges with all-ceramics on natural dentition and implants" at the IFED 2013.

Right next to the S-Bahn station "Rosenheimer Platz" and less than a 10-minute walk from the city center, the Hilton Munich City hotel is ideally located for guests wishing to explore Munich. Business is made easy at this hotel thanks to the excellent transport links to Munich's business districts, WiFi access and Business Center. A generously spaced working area and an ergonomically designed chair will help you to be effective and productive thanks to the convenient facilities of your room.

The town hall's tower harbors the world-famous Carillon which is dated back as far as 1908. The figures of the Carillon show parts of Munich's history. It hosts the city government including the **city council**, the offices of the **mayors** and part of the administration. A joust is displayed in the upper part which was arranged for the marriage of Duke Wilhelm V and Renata of Lothringen.
