## THIS MONTH'S: WORKSHOPS

### IVOCLAR WORKSHOP I:

**University lecturers (Priv. Doz.) Florian Beuer/Josef Schweiger**  
**Digital dentistry today – a question of materials and concepts**

Description: Florian Beuer and Josef Schweiger will present their concepts of computer-aided technology and innovative materials for producing esthetic and reproducible clinical results:

- All-ceramic solutions on dental implants
- Digital veneering solutions
- Increasing the vertical dimension of occlusion
- The Munich Implant Concept MICTM

A unique opportunity to meet a team of two local experts in person, listen to their ideas about today's concepts and the future development of dentistry. Ivoclar Vivadent is offering a forum of open discussion about dentistry in the 21st century.

### IVOCLAR WORKSHOP II: Dr. Markus Lenhard

**Direct restoratives – mastering anterior and posterior challenges**

For single tooth restorations composites have become a viable alternative to full ceramics. Scientific data increasingly supports the use of resin composites even for large restorations including cusp replacement, full crown build-ups or even small bridges.

However, the clinical procedure imposes a range of challenges on the operator. Matching translucency in anteriors, creating the correct occlusal morphology and interproximal contacts and providing adequate physical properties to the composite, are only some of the issues which have to be addressed by dentists. The workshop focuses on the critical clinical steps, explains the most commonly encountered failures, and provides numerous clinical tips and tricks.
